

We are deeply honoured to receive the Disability Smart Impact Inclusive Communication Award. This recognition means a great deal to Uit met Autism, and to the autistic and sensory sensitive communities we support every day. We believe inclusion starts with clear, honest and practical information so people can make their own choices about leisure and participation in society.

With more than 500 locations already featured on our platform, we are proud of how far we have come. Our next goal is to reach a thousand locations, to expand further across the European Union, and welcome experience from around the world. Recognition on a stage like this shows that sensory activity and predictable leisure information are relevant not only nationally, but internationally as well.

We warmly invite autistic people to share their experiences on our platform, so that together we can make leisure more accessible and predictable for even more people. Thank you to the Business Disability Forum for this recognition, and thank you to everyone who has contributed to our work or in Dutch. Heel erg hartelijk bedankt (Thank you very much).
